

Wedding/Special Occasion Packages

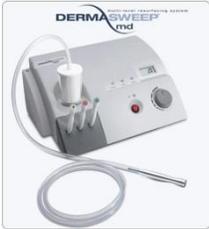

Everyone wants to look fabulous on their big day, and there are many different treatments that Dr. Davis offers to help you look your best. We recommend coming in for a **cosmetic consultation**, where Dr. Davis will create a custom plan to address your wishes. Dr. Davis will make you look younger, radiant, and rested. She does not advocate a “done” look, but can create one for you if that is your wish. We offer three scenarios:

- I. [If you are 6 months to a year away from your big event](#)
- II. [If you are two weeks away from the big day](#)
- III. [If you are on a budget](#)

I. If you are 6 months to a year away from your big event...

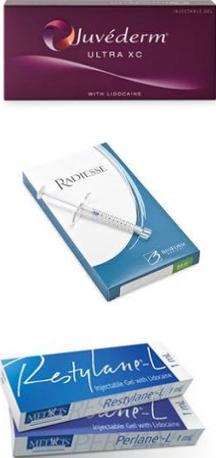

With plenty of time before your big day, you have the opportunity for the ideal combination of therapies for maximized facial rejuvenation. **Surface treatments** to correct color and textural irregularities, **fillers** to add volume, and **Botulinum toxins** to relax folds on the upper face, are three categories of treatment that work well in conjunction with each other. Many of these procedures can even be performed together at the same session, so check with us to see what can be optimally combined, and request that extra time be blocked off for this type of appointment.

Surface Therapies

Procedure	Description	Time Frame
 <p>Photodynamic Laser Therapy</p>	<p>1) Eliminates cystic acne, shrinks oil glands, and creates collagen to diminish acne scars.</p> <p>2) Can dramatically eliminate brown and red sun spots.</p>	<p>Three Monthly Sessions (expect 2-4 days of “down” time after each treatment.)</p>
 <p>Clear + Brilliant Laser</p>	<p>Reduces pore size, eliminates excess pigment and spots, tightens your skin, and gives you a fabulous glow. Safe for people of all skin colors, women and men.</p>	<p>Five treatments, one every three weeks, with no “down time.” Cannot wear makeup the same day/night of treatment.</p>
 <p>Dermasweep</p>	<p>A treatment combining microdermabrasion and a chemical peel. Each treatment includes up to two oil-free infusions (for treatment of acne, pigment, redness, and to increase brightness and glow). You can mix and match for best results.</p>	<p>Six treatments, one every 2-4 weeks, with a suggested maintenance session once a season thereafter.</p>

 <p>LIGHTSheer DUET™</p> <p>Laser Hair Removal</p> <p>and</p> <p>Diode Laser</p>	<p>Dr. Davis can target your problem areas (face, arms, bikini line, underarm, wherever you wish) so you never have to shave or wax again! With our new LightSheer Duet diode laser, experience painless removal of back, chest, and leg hair in minutes with the laser's larger spot size.</p>	<p>Typically 6 treatments, monthly for the face and every two months for the body.</p>
	<p>The LightSheer Duet's diode laser can remove brown spots on the tops of hands.</p>	<p>Treatment schedule depends on the patient.</p>

Fillers

Procedure	Description	Time Frame
 <p>Filler</p>	<p>Fillers (eg Juvederm, Radiesse, Restylane) are great injectable products that Dr. Davis uses to instantly lift wrinkles, indented scars, and under eye hollows and shadows. These products can also be used to augment your cheekbones and can be injected to give you fuller, sexy lips. Radiesse is used to create a non-surgical "facelift."</p>	<p>Test treatment six months prior to your big day (recommended), then injections repeated three weeks prior to the event.</p>
 <p>Sculptra</p>	<p>For patients who desire more than a syringe or two of filler, we suggest Sculptra. Dr. Davis' injections will stimulate your body to make your own collagen at injected sites and results will last over two years.</p>	<p>Monthly treatments (one per decade), with results seen 1-2 months after the first treatment.</p>

Botulinum Injections

Procedure	Benefits	Time Frame
 <p>Botox</p>	<p>Botox (or Xeomin or Dysport – that work the same way) is an injectable muscle relaxant that will eliminate dynamic wrinkles across your forehead, between your eyebrows, and at the outer corners of your eyes.</p>	<p>Test injections six months prior to your big day (recommended), then three weeks prior to the event.</p>
 <p>Botox for Hyperhidrosis</p>	<p>An alternative use of Botox is to treat hyperhidrosis (excessive sweating). Dr. Davis can inject Botox into your underarms, hands, or feet to eliminate perspiration in that region. Don't ruin your special outfit... shake hands with confidence!</p>	<p>Injection two weeks before your event for a treatment that will last 4-6 months.</p>

II. If you are two weeks away from the big day...

Even if there are only a couple of weeks before your big day, there are still treatment options for you! With a timeline this short, all of these suggested treatments are for one session. If you have more time, reference the other timelines for full treatment schedules.

--	--

 <p>clear+ brilliant Smoother, fresher looking skin Improved tone and texture Natural radiance and glow Simply, clear + brilliant skin</p> <p>Clear + Brilliant Laser</p>	<p>Reduce pore size, minimize pigment, tighten your skin, and give your face, neck, and chest a fabulous glow.</p>
 <p>Fillers</p>	<p>Fillers can lift wrinkles, folds, and indented scars on the mid and lower face, while Botox will ensure the lines on the upper part of your face are lessened.</p>
 <p>Botox for Hyperhidrosis</p>	<p>Dr. Davis can inject Botox into your underarms to eliminate perspiration in the region. People with "sweaty hands or feet" can have these areas treated as well.</p>

III. For those on a budget...

 <p>Restylane and Juvederm</p>	<p>A half syringe targeted to areas that need the most correction will still have impact. (Lift lips, lift acne scars and wrinkles near the nose)</p>	<p>One treatment, three weeks before your event.</p>
---	--	--

 <p>Botox/Dysport/Xeomin-mini</p>	<p>For those who wish to include Botox/Dysport/Xeomin treatments, but are on a budget, we recommend the Botox/Dysport/Xeomin-mini. This option will soften your fine lines, but not give you full relaxation; for a fraction of the cost of a regular treatment.</p>	<p>One to three minis three weeks before your event.</p>
 <p>Dermasweep</p>	<p>A treatment combining microdermabrasion and a chemical peels, Dermasweep can help you brighten your complexion, even out skin tone, and quash any acne breakouts. A choice of four different oil-free infusions allows you to customize your treatment.</p>	<p>Six treatments, one every 2-4 weeks.</p>
